PUBLIC MAY PARTICIPATE IN LEGISLATIVE REVIEW

*The following notice has been received from
JAMES FOSTER, Minister of Advanced Education.*

Several months ago I announced the commencement of a review of legislation designed to examine the need for amendment of all statutes and Acts of the Legislature concerning adult education. Specifically, the review is directed toward The Universities Act, The Colleges Act, The Students Finance Act, The Trade Schools Regulation Act, and The Department of Advanced Education Act. The review is well under way. Basic background research has been completed and, by consultation, a means has been established for an exchange of ideas, and discussion of concepts and principles with the variety of institutions and their representative agencies which make up the adult education system in Alberta.

I would now like to extend an opportunity to all members of the public to engage in this exchange and participate in the review, whether or not such persons are associated with an institution.

We are looking at several methods that will assure every member of the public an

opportunity to express his ideas and engage in a discussion of principles. First, any interested person may communicate with the office of the Director of Legislative Services, Department of Advanced Education. R. D. KAROLES, who is in charge of the review, may be contacted by correspondence addressed to him at the Devonian Building, 10th floor, Edmonton, or by telephone at 426-7640. It is hoped that, by exchanges of opinion, all members of the public interested in the review will initiate contact with Mr. Karoles and thereby serve to add to the development of background material for the general review of legislation.

Secondly, those who wish to make formal submissions or briefs directly to me may do so. In order to complete this portion of the review and provide all persons with sufficient lead time to apply their thoughts and efforts to the content of any submission they may wish to make, September 1, 1974 ought to be regarded as a deadline for making submissions. Questions respecting the format and content of briefs might be directed to Mr. Karoles.

I hope the submissions will cover a wide variety of subjects and issues affecting the adult education system as a whole. For example, submissions might relate to the

development of institutions, programs and courses concerned with trade, vocational and technical training, the operation and administration of technical institutes, colleges and universities. Briefs might focus their attention upon a single issue or many issues, such as the relationship between government and institutions engaged in the provision of post-secondary education, the role of the Senate, the role of faculty and student associations, matters of import to academic and non-academic staff. As the review is not confined to these matters I expect that participants will feel free to examine any subject they regard as important.

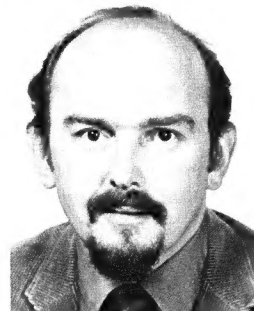

For those who wish an opportunity to supplement their briefs with a verbal submission arrangements will be made for them to meet with me early in September or October. Of course, full examination of all submissions will extend beyond September. Indeed, the review is an on-going project. Meetings currently being held between Mr. Karoles and all institutions are not expected to conclude until the spring of 1975, following which draft legislation will be circulated for comment.

My expectations for the review are high. Hopefully, by working together we can produce legislation which can operate as a guide to the development of a system of education for adults of which all Albertans can be proud.

APPOINTMENTS

F. B. COOKSON, Professor of Anatomy and Honorary Lecturer in Medicine, has been appointed Director of the University Health Service, effective July 1, 1974. He has been Acting Director since November 1972. Dr. Cookson holds a BSc degree (Honors) from Manchester University. He carried out postgraduate work while holding internships at the Manchester Royal Infirmary and the Park Hospital, and obtained his Diploma in Obstetrics and Gynaecology in 1957. After six years of general practice, he left England to accept a position at the University of Saskatchewan. Dr. Cookson has been on staff at The University of Alberta since 1966.

HAROLD JACKSON, Associate Professor of Food Science, will become Chairman of that department July 1, 1974. He has been Acting Chairman since July of last year. Dr. Jackson earned his MSc in Agricultural Microbiology at the University of Nottinghamshire and his PhD in Dairy Science at this University. Following completion of his doctorate, he joined the staff of what was then the Department of Dairy Science here. In 1970-71 he studied at the Food Research Institute in Norwich, England. He has conducted extensive research on the utilization of soybeans in human nutrition and on the effect of temperature on micro-organisms associated with food poisoning.

ELECTRICAL ENERGY SAVINGS

*The following notice has been received
from R. E. PHILLIPS, Director of Physical Plant.*

In the April 12, 1973 issue of FOLIO an appeal was made to all staff and students to turn off lights in work areas when the areas were vacated.

To indicate progress, a comparison has been made of 18 major University buildings in which it is considered occupancy has not changed significantly. The periods chosen were April to February inclusive for the years 1971-72, 1972-73, and 1973-74. Electrical energy consumption for the buildings considered went up by 0.6 percent in the second period. It went down 8 percent in the period 1973-74 compared with 1972-73. This represents a savings of \$51,000.

This is a significant amount that can only

be maintained by attention to shutting off unneeded energy consuming devices. Not included in the above savings is another saving brought about by the reduction in air conditioning necessary to get rid of the heat produced. Recent surveys of classrooms and labs indicate many of these are still to be found empty but fully lighted. More attention to shutting off unnecessary lights, fans, heaters, air conditioners, etc. could easily increase this savings to well over \$100,000 per year.

FIRST CASES HEARD BY TRIBUNAL

The following notice has been received from MRS. M. M. MIDGLEY, Secretary to General Faculties Council.

The first two cases to come before the new General University Disciplinary Tribunals were held on Friday, March 8, 1974. These cases involved cheating at an examination, and resulted in a punishment of expulsion in one case and a twelve-month suspension in the other. Appeals from decisions of such tribunals may be made to a General University Appeal Board.

NOTICES

ADVANCE REGISTRATION

The following notice has been received from A. L. DARLING, Assistant Registrar.

Photographic lab work by Technical Services

The initial response has been so great that there is a shortage of Registration Procedures Booklets which contain the 1974-75 Timetable; 7,500 copies of the booklet were printed by March 1 with the balance to be available by March 15 as production was affected by a shortage of newsprint.

More booklets are now available for those students who have not obtained copies. It is being suggested that in the meantime students attempt to share the available copies.

FUNDS AVAILABLE FOR EDUCATIONAL TELEVISION PROGRAMS

The following notice has been received from W. H. JOPLING, Acting Director, Radio and Television.

Public Service Grant funds are now available to University departments for television productions which can be used for public education. Physical Education, Business Administration, Drama, Music, Psychology, and Fine Arts are currently making use of these funds. For information on their use, contact either W. F. ALLEN, B. KIENAPPLE, or myself.

The resources of the Department of Radio and Television are currently being utilized quite heavily. We do not anticipate a heavy work load May through September. If you have any thoughts of producing a video tape for public education or for use in the classroom next fall, it would be wise to contact Mr. Kienapple, Supervisor of Television Production, or myself fairly soon.

EDO NYLAND of Physics has just completed a half-hour program on earthquakes which will be used for instructional purposes. JULIETTE MC MASTER of English also recently completed a 12-minute program on the card game from the poem "Rape of the Lock." These are two good examples of how television can be used to augment classroom instruction. Anyone who would like to see these tapes can do so by contacting us.

The department has a considerable amount and variety of video equipment for loan. For information contact JOHN SLEIK, Technical Supervisor, 432-4962.

If you have any questions or comments, please let me know.

CAMPUS LAW REVIEW COMMITTEE

A meeting of the Campus Law Review Committee will be held on March 22 at 12 noon in room 3-17 University Hall to review the present disciplinary regulations of the University and corresponding proposals from the Law and Order Committee.

Members of the University community are invited to make submissions. Notice of

intention to make a submission should be made by March 20 to MRS. SUSAN MELVILLE, room 2-1 University Hall, telephone 432-4965. Further enquiries may be made at the same office.

WORKSHOP ON SOCIO-PHYSICAL ASPECTS OF BEHAVIOR IN ORGANIZATIONS

FRED I. STEELE, consultant with Development Research Associates of Newton Center, Massachusetts, will conduct a two-day workshop in socio-physical aspects of behavior in organizations, March 21 and 22.

Sponsored by the Department of Extension, the workshop will provide theory, examples, and practical exercises to increase understanding of the impact of physical settings on people and ways of using physical changes to facilitate work activities.

The workshop will be held from 9:30 a.m. to 5 p.m. each day. The registration fee is \$40. Applications may be made at the Department of Extension, room 228 Corbett Hall, or by calling 432-5055.

USE OF EQUIPMENT IN POOL

Equipment such as masks, snorkels, flippers, arm bands etc. may be used in the pool during all family swim times which now are: Tuesdays, Wednesdays, and Fridays, 7 to 8 p.m.; Saturdays and Sundays, 1 to 3 p.m. These are the only times that the use of extra equipment will be permitted in the pool.

Concern has been expressed in the past over parents who do not closely supervise children wearing "aids." If parental supervision becomes lax it will be necessary to revert to one "equipment night" per week.

SUMMER ACADEMIC PROGRAM IN ISRAEL

The State University College at Oneonta, New York, in co-operation with Hebrew University, Haifa University, and Bar-Ilan University, is offering its eighth summer academic program in Israel in July and August, 1974. The overseas program will be for a seven week period.

"Modern Israel" is for students who desire an intensive study of Israel's economic, social, political, religious, educational, and scientific institutions.

Participation is limited to those who can meet the entrance requirements of the State University of New York. There are no language requirements. YONAH ALEXANDER, Professor of International and Foreign Area Studies at the State University College at Oneonta, will be director of the program.

Further information may be obtained by writing to Professor Alexander at State University College, Oneonta, New York, USA 13820.

Paintings by water colorist MURRAY MAC DONALD, Visiting Professor in the Faculty of Education, and by three of his students are currently being exhibited in the Faculty Lounge, tenth floor, Education Centre. Two of the students—ROBERT GUEST and WALLY MURPHY—will receive their BEd degrees this spring; the third student, ADELINE ROCKETT, has already earned her degree. The water colors were all done during an independent study program supervised by Professor MacDonald.
